

### 3. SPIKE NFT MARKETPLACE

At SPIKE NFT market place, we're excited about a brand new type of digital good called a non-fungible token, or NFT. NFTs have exciting new properties: they're unique, provably scarce, tradeable, and usable across multiple applications. Just like physical goods, you can do whatever you want with them! You could throw them in the trash, gift them to a friend across the world, or go sell them on an open marketplace. But unlike physical goods, they're armed with all the programmability of digital assets.

A core part of our vision is that open protocols like Ethereum and interoperable standards like ERC-721 and ERC-1155 will enable vibrant new economies. We're building tools that allow consumers to trade their assets freely, creators to launch new digital works, and developers to build rich, integrated marketplaces for their digital assets. We are proud to be the next market for NFT

### 4. SPIKE MULTICHAIN DEX

SPIKE DEX is a unique combination of centralized and decentralized architecture that together create a superior user experience for both casual and advanced users.

SPIKE DEX we will build on many different platforms ( BSC, ERC20, SOL, POLYGON, NEAR, FANTOM.) . You will be able to freely trade all coins without having to use other Dex.

We are also delightful to announce that a decentralized margin system 20X will be built for all Platforms
